

INSTRUCTIONS

What is the game about?

Find a meme that fits the caption!

The caption is either provided on a card or generated randomly on the website. The players then have to find a meme – they can use the provided cards or go on an internet quest to find one online! They can even act it out physically – there are no limits to the imagination.

But watch out: there is a 60 second time limit!

Why should I play?

Because it is a fun way to spend time and you even learn something. All captions are somehow related to sustainable behaviours and promote a green lifestyle.

What do I need?

The GREEN MEME EFFECT game can be played as a physical card game as well as digitally with no other resources than a smartphone, a tablet or a PC (one device per player) or even in a mix of both.

Who wins?

The winner of each round gets to keep the caption card and when you finished the game, count who has the most caption cards.

More information and all downloads:

www.green-meme-effect.eu

- All played meme cards are put back into the meme stack and everyone who put down a meme card gets to draw a new one (so that everyone has 5 meme cards in their hand).
- Then, the next player gets to be the JUDGE.

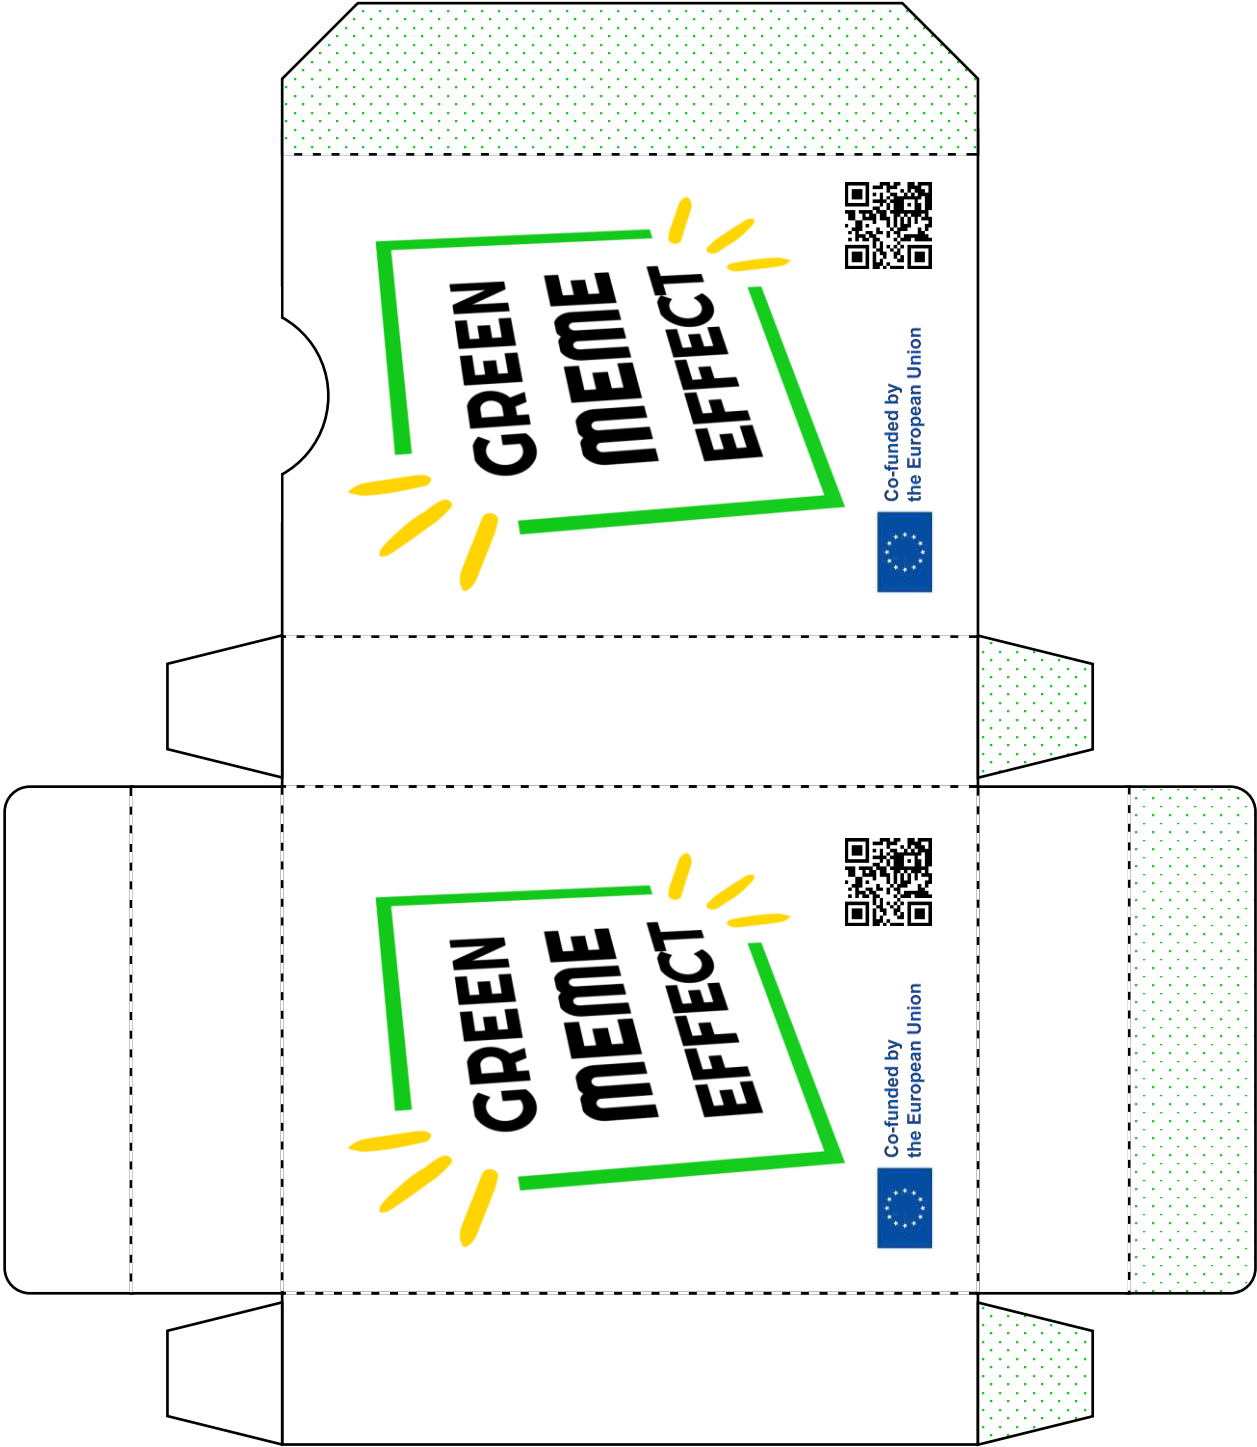

- The JUDGE now collects all meme cards, mixes them and puts them face-up next or below the caption card.
- Now, it is time to decide which meme is the funniest and fits the caption best! The player who drew the caption selects the winning meme the owner of the winning meme receives the caption card as token of their win.

- Sort the cards in two stacks: one for captions, one for memes.
- Each player gets 5 meme cards at the start of the game on their hand.
- One player is selected to be the JUDGE of the first round (for example the youngest) and draws a caption for everyone to see.
- All other players have now 60 seconds to select a meme card and put it face-down on the table. (We recommend using the timer of your smartphone)
